DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

The reply filed November 11, 2006 is not fully responsive to the prior non-final Office action mailed October 4, 2006 because Applicants did not elect a polynucleotide that encodes a protein of Figure 2 as set forth in the Election/Restrictions. Figure 2 consisted of Figures 2A-Figures 2F, which corresponded to several different sequences. Applicants are reminded that "a polynucleotide" and "a polypeptide" is regarded as one molecule. Applicants have amended claim 11 to encompass three separate and distinct polynucleotides, which have not been shown to share a common core structure and consequently are different inventions. The sequences are determined to be unrelated and are composed of different deoxyribonucleic acids.

In order to be fully responsive Applicants should elect a polynucleotide. Currently, claim 11 is directed to three different inventions and once Applicants select one invention reading on one sequence the claim will embrace nonelected inventions.

Since the above-identified reply appears to be bona fide, Applicant is given a time period of ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid ABANDONMENT.

Applicants' response is not accepted for the reasons set forth above and any inquiry concerning this communication or earlier communications from the examiner should be directed to Alana M. Harris, Ph.D. whose telephone number is (571)272-0831. The examiner works a flexible schedule, however she can normally be reached between the hours of 6:30 am to 5:30 pm with alternate Fridays off. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Larry R. Helms, Ph.D. can be reached on (571) 272-0832. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
